

Having opened a PDF worksheet in a new DocReader, students can use the **Split View** feature to display it beneath their Document, for easy reference without needing to switch back and forth.

Options are available in the top-right corner for different views.

Click the **Split View** icon.

This displays the Document and PDF at the same time.

Click here to adjust the page view.

Rotate Right – turn the view 90° clockwise.

Rotate Left – turn the view 90° anticlockwise.

Fit Vertical – zoom until the page height fits the window.

Fit Horizontal – zoom until the page width fits the window.

*Click here to **zoom in** and **zoom out**.*

To adjust the DocReader height, **hover** the cursor on the boundary until it changes to a **double-headed arrow**.

Click and drag up or down to resize the DocReader window.

Did you know?

You can navigate between pages in the DocReader by scrolling vertically, or by using the arrows in the top-left corner.
